DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to the magnetic circuit of a rotating machine, classified in class 310, subclass 254.

Group II, claim(s) 6, drawn to the magnetic circuit of a rectangular wave generator/motor, classified in class 318, subclass 437.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they are classified in different classes and group II includes phase and position detecting means which are not in Group I.

3. A telephone call was made to attorney Gregory Schivley, Reg. No. 27,382 on 12/27/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
